

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Siam	Limited Monarchy	Belgrade	Peter I	June 15, '03	18,620	2,688,025
Spain	Absolute Monarchy	Barcelona	Chowfa Maha Vajiravudh	Oct. 22, '10	195,000	6,686,846
Spain, Colonies of					194,780	19,503,068
Sweden	Limited Monarchy	Stockholm	Alphonso XIII	May 17, '86	80,580	291,946
Switzerland	Republic	Bern	Gustaf V	Dec. 8, '07	172,876	5,377,713
Turkey and tributary states	Republic	Berlin	M. Forster	Jan. 1, '12	16,976	3,741,971
United South Africa	Confederation	Constantinople	Mohammed V.	April 7, '09	1,157,860	24,817,700
United States	Republic	Pretoria, Cape Town	Viscount Gladstone	May 30, '10	473,184	5,958,499
Uruguay	Republic	Washington	William H. Taft	March 4, '09	3,567,563	93,402,151
Venezuela	Republic	Montevideo	Jose Battle y Ordonez	March 1, '11	72,210	1,140,799
	Republic	Caracas	Juan Vicente Gomez	June, '10	393,976	2,664,341

a Under suzerainty of Turkey, but actual administration controlled by Great Britain. b Exclusive of Egypt.

THE WORLD

SHAPE AND SIZE OF THE EARTH: The earth is very nearly an oblate spheroid whose short axis coincides with its axis of rotation passing through the two poles.

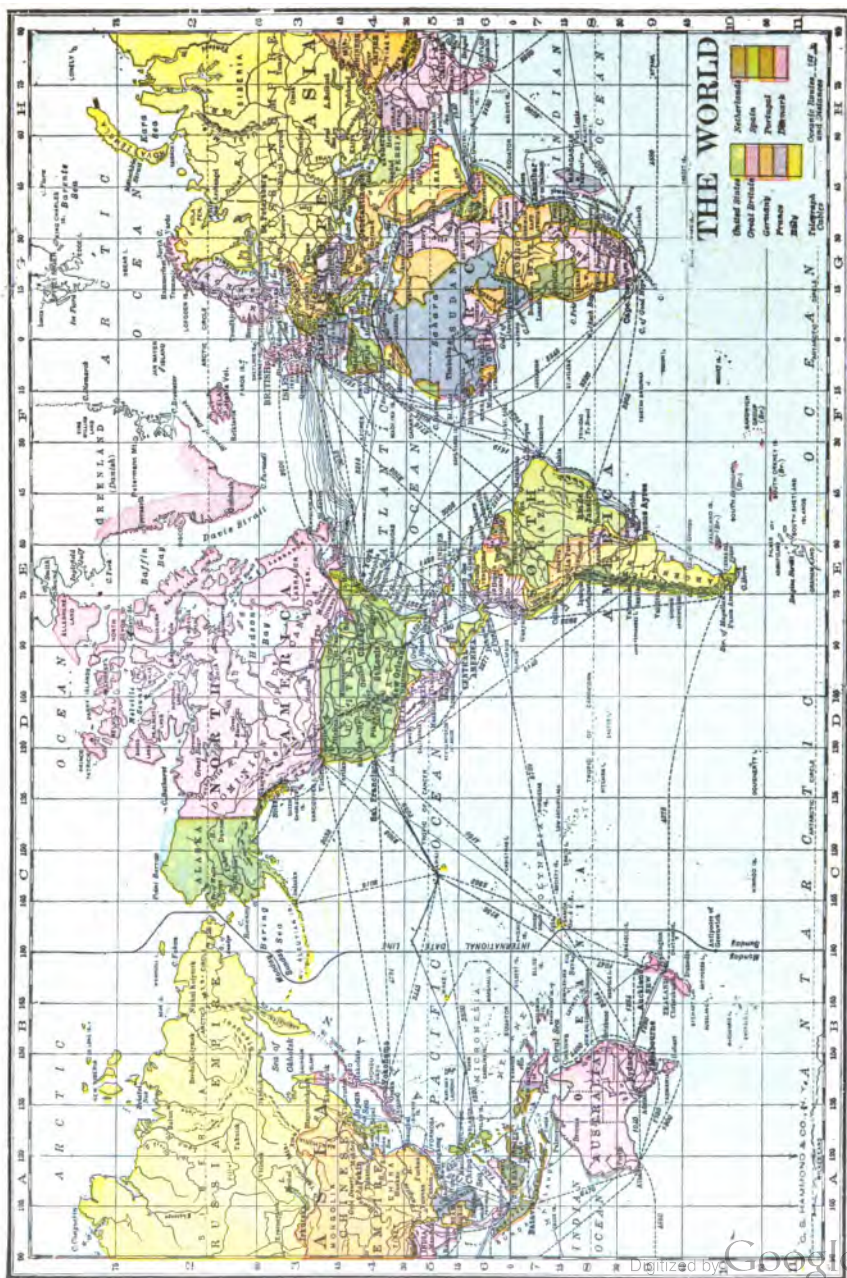

According to Colonel Clarke's calculations, its major axis measures 41,852,124 feet, or 7,926.5 statute miles; its minor axis 41,710,245 feet, or 7,809.5 statute miles; its circumference along the Equator measures 24,902 statute miles, or 21,600 geographical miles; its total area 178,940,460 statute square miles; and its volume 259,880 million cubic miles.

Of this total area, 8.4 p. c. (16,464,700 sq. m.) are within the Arctic and Antarctic regions; 51.6 p. c. (102,244,654 sq. m.) within the two temperate regions; 40 p. c. (78,331,046 sq. m.) within the Tropics.

THE LAND: The land covers 54,807,430 sq. m., on the assumption that 250,000 sq. m. of land remain to be discovered within the Arctic Regions, and that the supposed Antarctic continent, or "Antarctica," has an extent of 2,500,000 sq. m. within the Antarctic Circle.

THE OCEANS: The oceans, including the inland seas connected with them, cover 142,132,990 sq. m., or 72 p. c. of the total surface of the earth. There are 2.59 sq. m. of ocean to every sq. m. of land. This area is distributed over the different areas as follows: Arctic Ocean, including Hudson Bay, 5,785,000 sq. m.; Atlantic Ocean, 34,301,400 sq. m.; Indian Ocean, 28,615,600 sq. m.; Pacific Ocean, 67,699,630 sq. m.; Antarctic Ocean, 5,731,350 sq. m.

HEIGHTS AND DEPTHS: The mean height of the land has been estimated at 2,440 feet; the mean depth of the sea 11,470 feet (Karstans). The highest mountain (Mt. Everest) rises to a height of 29,000 feet; the greatest depth of the ocean as yet discovered (in the Pacific, between Guam and Midway) is 51,610 feet. If the whole of the solid crust of the earth were to be levelled, so as to form a spheroid, it would still be covered by an ocean of a uniform depth of 8,000 feet (Prof. Peuck).

MAP OF THE WORLD ON THE EQUIVALENT PROJECTION

EXPLANATORY NOTE

This new map presents a comprehensive view of the superficial area of the earth, not unlike that which would be displayed by the printed cover of a globe, if removed and flattened.

On this map all areas appear in their true proportion. For example, Greenland, which, on Mercator's Projection, seems to be larger than South America, here is shown in its relative proportion of size to that continent, having less than one-eighth of the latter's area. In fact, this is the only projection in which are shown the equivalent areas, or correct sizes, of all parts of the globe, in their proper relative position.

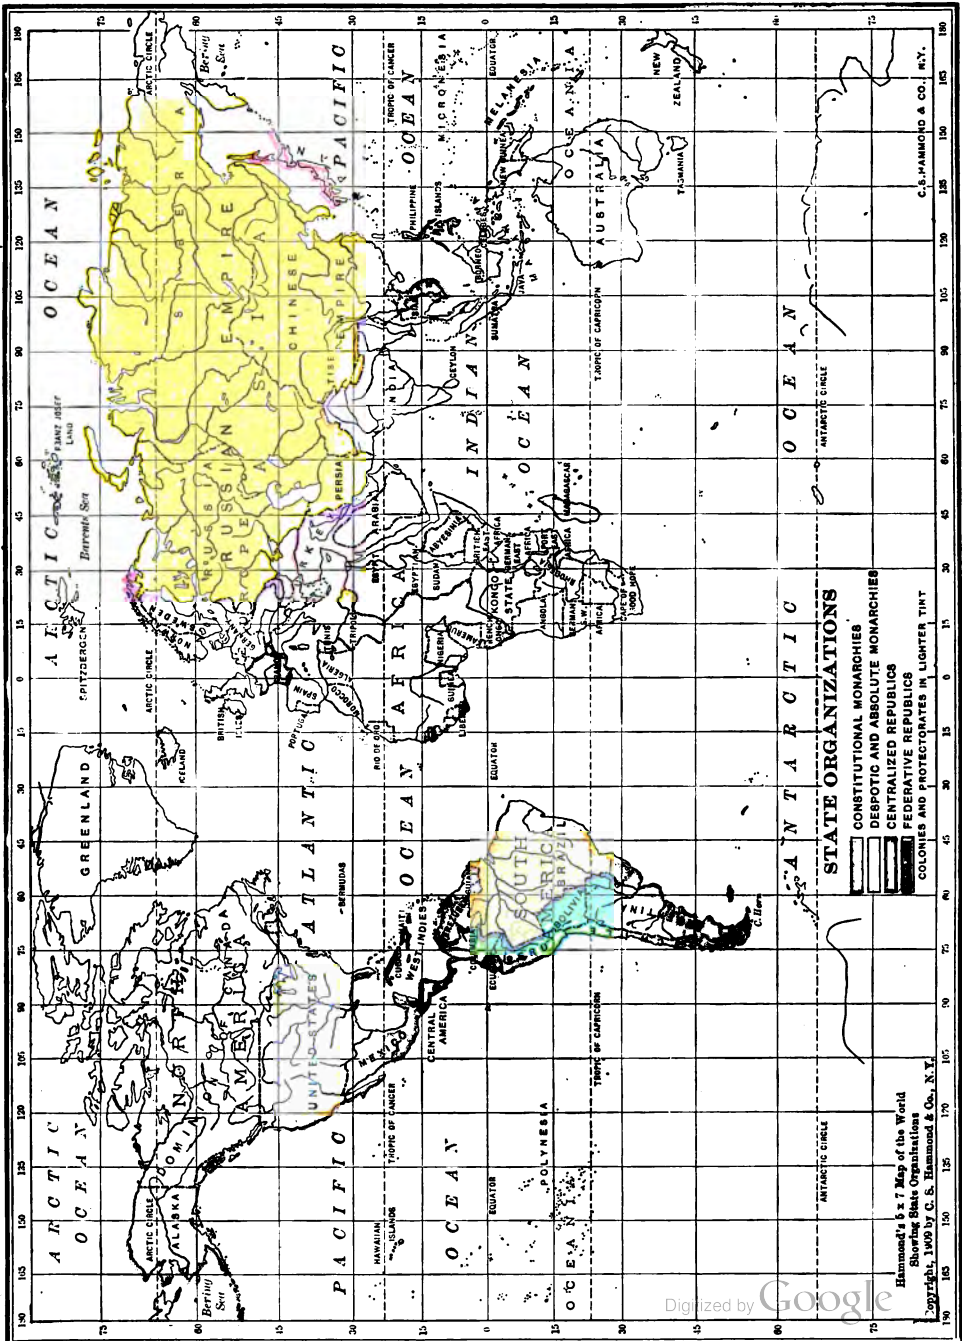

The meridians are placed fifteen degrees apart, and, since this interval is equal to one hour of time, meridians and intervals make a standard time-map for the whole earth.

Submarine Cables shown in fine black lines.

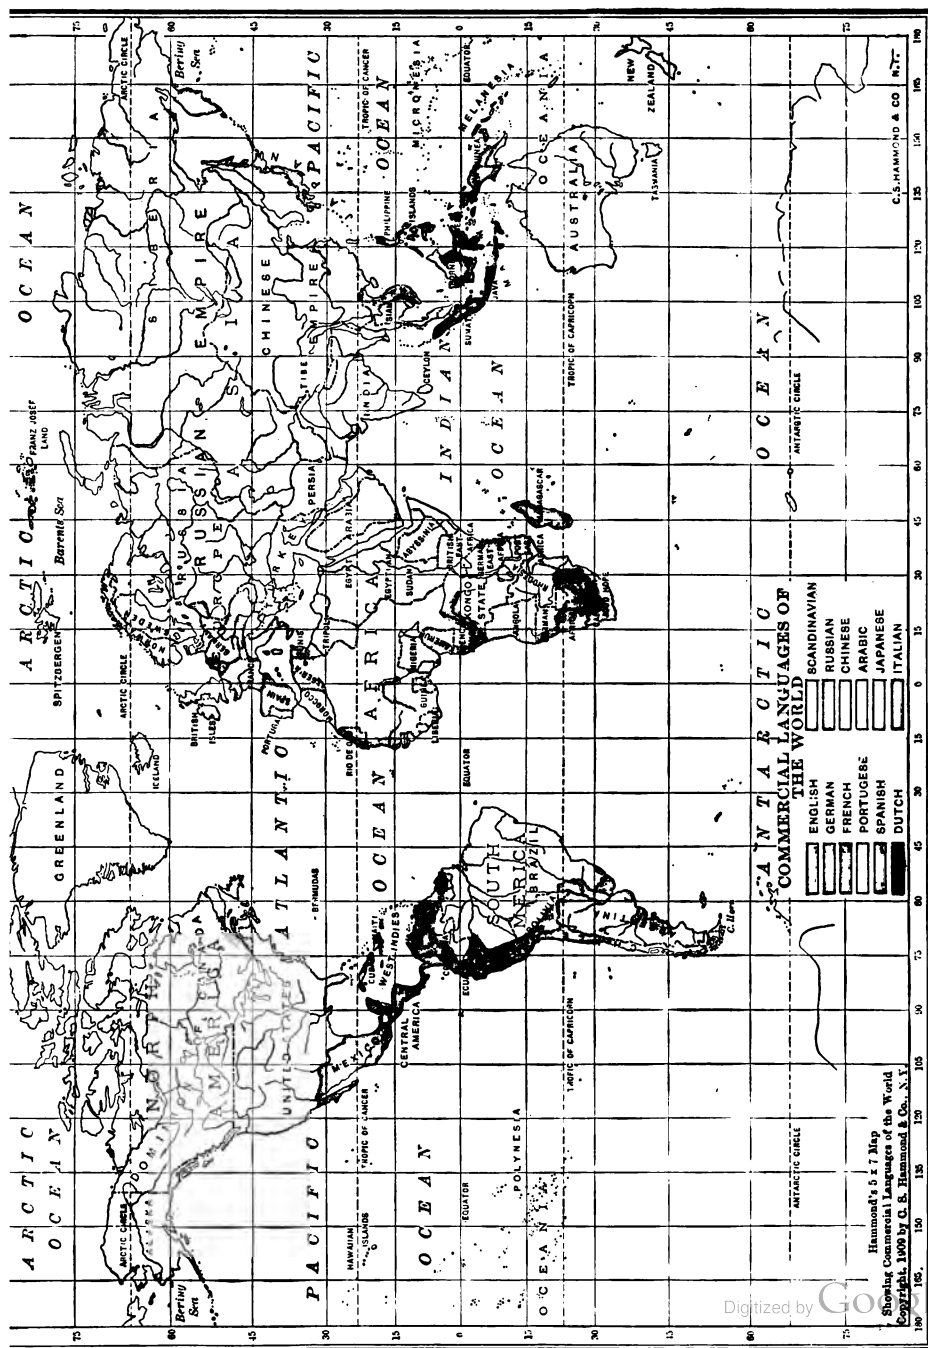

The International Date Line, as agreed upon by leading nations, shown in heavy broken lines.

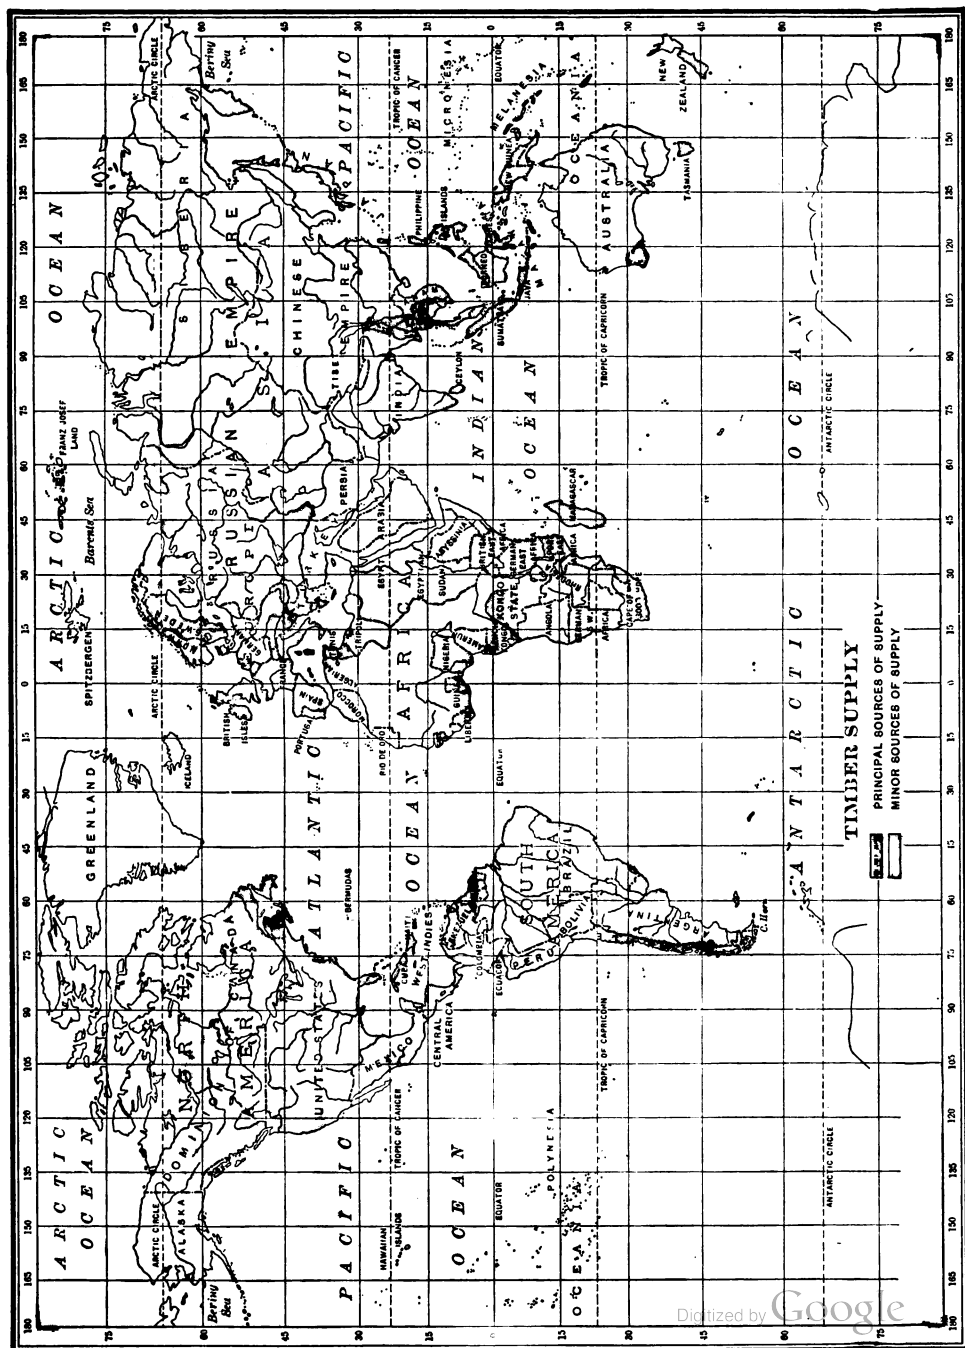

Colonial possessions of European powers in Africa, Asia and Oceania, shown in colors corresponding with those used for mother countries.

PRINCIPAL CITIES OF THE WORLD

The following list contains the principal towns of the world in all countries except the United States. In it will be found approximately all places of more than thirty thousand inhabitants and most of those of from twenty to thirty thousand. The population figures are from the latest census or are estimates from the most reliable sources.

Aachen, Germany.....	144,095	Ascoli, Italy.....	28,882	Berdiansk, Russia.....	29,168
Aalborg, Denmark.....	31,457	Ashkabad, Russia.....	26,835	Berditchef, Russia.....	53,728
Aarhus, Denmark.....	55,193	Ashton-under-Lyne, Eng..	45,000	Bergamo, Italy.....	47,772
Abbeokuta, Yoruba.....	200,000	Asnières, France.....	31,336	Bergen, Norway.....	72,251
Aberdare, Wales.....	43,357	Asti, Italy.....	38,045	Berlat, Roumania.....	24,000
Aberdeen, Scotland.....	185,000	Aston Manor, England.....	85,000	Berlin, Germany.....	2,400,148
Abo, Russia.....	43,680	Astrakhan, Russia.....	121,580	Bern, Switzerland.....	70,339
Accrington, England.....	48,890	Asuncion, Paraguay.....	60,000	Bernburg, Germany.....	34,928
